

The starting materials for photosynthesis are:

The products of photosynthesis are:

The starting materials for cellular respiration are:

The products of cellular respiration are:

The starting materials for photosynthesis are:

_____ ENERGY

_____ CO₂

_____ H₂O

The products of photosynthesis are:

_____ GLUCOSE C₆H₁₂O₆

_____ OXYGEN

The starting materials for cellular respiration are:

_____ GLUCOSE C₆H₁₂O₆

_____ OXYGEN

The products of cellular respiration are:

_____ ENERGY

_____ CO₂

_____ H₂O

The two ways cells release energy are _____CELLULAR
RESPIRATION___ and _FERMENTATION_

Fermentation releases energy without using _OXYGEN.

ALCOHOLIC_____ fermentation occurs when yeast converts
sugar to alcohol and CO₂ .

LACTIC ACID___ fermentation occurs when bacteria converts
sugar into lactic acid.
